ABOUT US

Welcome to Ashirwad Polymers & Perfect Polymers, your number one source for all flexible PVC Shrink, Rolls, Sleeves, Pouches (printed and plain) requirements. Ashirwad Polymers & Perfect Polymers is one of the fast growing manufacturers in PVC Shrink Film Industry. We are decided to giving you the very best of our products, with a focus on Quality Service, Durability & Price.

With a rich experience of over 25 years, Ashirwad Polymers & Perfect Polymers was founded in 2010 by Mr. V. Ramesh Singh, Mr. R. Prem Kumar Reddy, we have come a long way since then. Out of the passion for becoming a successful entrepreneur and a dream of offering employment to various segments of people, drove them to start Ashirwad Polymers & Perfect Polymers so that high quality premium PVC Shrink products can be offered at a competitive price.

We now serve customers all over indo – African countries and we are delighted that we are able to turn our passion into our work. We hope you enjoy our products & services as much as we enjoy offering them to you.

With the utmost dedication of our production and management staff, Ashirwad Polymers & Perfect Polymers have achieved a production capacity of 50 Ton per month and is rapidly growing every day.

ACHIEVING EXCELLENCE IN PACKAGING & PRINTING

Ashirwad Polymers & Perfect Polymers is a fully integrated packaging company providing total solutions to your PVC shrink product requirements.

We are offering our services and products to numerous clients across India and Africa, being one and only leading manufacturers and exporters in South India.

Our clients include Pharmaceuticals & Cosmetics, Health & Personal Care, FMCG Companies, Food & Beverages, Consumer Products, Textiles and Lifestyle brands. Housing the finest machinery, raw material, infra structure and logistics, Ashirwad Polymers & Perfect Polymers are propelling ahead with complete dedication, vision & focus to excel in the future.

THE VISION

We aspire to deliver top quality products and services to clients globally, having carved a niche for the company directly in India and indirectly in Asia & Africa.

OUR MISSION

- ✿ Cutting edge Technology
- ✿ Cost effective Solutions
- ✿ Efficient printing services
- ✿ Value of global clientele
- ✿ Openness, Team Work
- ✿ Simplicity, Innovation
- ✿ To maintain the quality of products

MARKET SOLUTIONS

FOODS & BEVARAGES

These highly attractive labels are printed on a flexible shrink film that reduces in size through the application of heat. Once the film shrinks, it conforms tightly to the shape of the container or product, creating a sleek label and product package. With a 360° display of brilliant artwork and text, custom shrink sleeves give products maximum aesthetic impact and marketing exposure.

HEALTH CARE

Using distortion to allow text and images to appear correctly and proportionately after application is complete, shrink sleeves can be altered to fit a shape packaging and are the perfect option for your specially designed container.

COSMETICS

The 100 – year – old technology has been refined and engineered to create the fastest, most consistent shrink label printing with the highest level of image rendering. Rotogravure printing utilizes lower cost inks, but delivers more ink to substrates and beautiful, saturated colours. Shrink label printing creates a new dimension to standard sleeve printing.

HOME AND PERSONAL CARE

Creating two – dimensional art for a three – dimensional surfaces requires a level of finesse that other printers cannot match. Our experienced tie-ups ensure your label looks best on your container.

QUALITY CONTROL

At Ashirwad Polymers & Perfect Polymers, we understand the importance of consistent quality and have set up a streamlined work flow for quality control post every stage of the printing and production process.

We are committed to manufacturing products which adheres to the highest standard of quality on a global level stringent in –

process testing, consistently measuring up to our client's satisfaction.

PVC (POLY VINYL CHLORIDE)

- Up to 63% Shrink
- PVC starts to shrink at roughly 130°F
- Lower costs due to widely available Raw Materials

INFRASTRUCTURE

Ashirwad Polymers & Perfect Polymers having a wide range of machinery which includes printing machine, high speed automatic cutting and sealing machines, PVC heat shrink film plants and cutting machines. Our manufacturing facility is comprised of ample Production Area, Store and Ware House.

We are driven by high skilled man power with fully equipped latest machinery and up to date facility to provide quality products within stipulated time frame.
